техническая спецификация

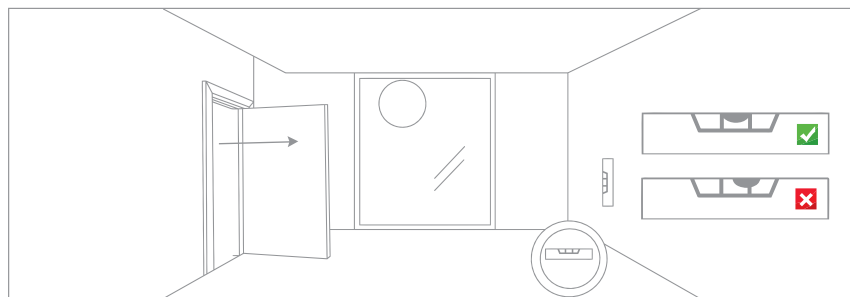

Ficha de datos

- In order to properly install the products, the cross or parallel linings should be used. The cross parallel linings are used for more beautiful installation, where the important technical issues (concerns), the alignment of the products and the prevention of any deformation on wall and floor surfaces should be considered.
- The minimal use of the offered cross linings will help you to make your ceramic installation more comfortable, fascinating and elegant. Therefore, in order to prevent any fault, the following items should be considered:
- Rectified products: at least 2 mm
- Non-rectified products: at least 2 mm
- Rastic products: 3 - 5 mm
- Remark: Regardless of the values written, the compliance with the installation rules of each region (country) is necessary, when the products are installed.

-Для правильной установки продукта необходимо использовать перекрестные или параллельные линии. Пересекающиеся параллельные линии используются для более красивой укладки, при технических проблемах необходимо учитывать соосность изделий и не допускать деформации поверхностей стен и пола.

Использование минимального количества показанных пересекающихся линий помогает сделать укладку керамической плитки более удобной, очаровательной и элегантной.

-Поэтому во избежание ошибок следует учитывать следующие ресурсы:

-Исправленные продукты: не менее 2 мм

-Неисправленные продукты: не менее 2 мм

-Крупные продукты (сельские): 3-5 мм

-Примечание: Независимо от написанных значений, соблюдение правил установки в каждом регионе (стране) необходимо при установке продуктов.

- Para instalar correctamente los productos, se deben utilizar los revestimientos cruzados o paralelos. Los revestimientos paralelos cruzados se utilizan para una instalación más bella, donde se deben considerar los problemas técnicos importantes, la alineación de los productos y la prevención de cualquier deformación en las superficies de la pared y el piso.

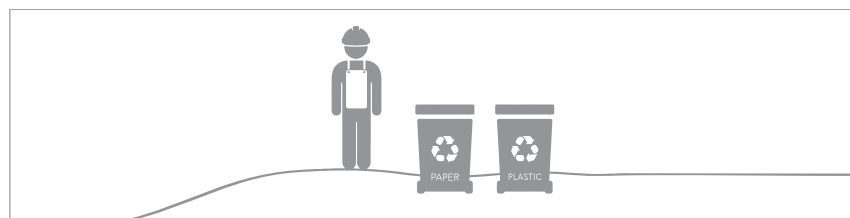

- El uso mínimo de los revestimientos cruzados ofrecidos lo ayudará a hacer que su instalación de cerámica sea más cómoda, fascinante y elegante. Por lo tanto, para evitar cualquier falla, se deben considerar los siguientes elementos:

- Productos rectificados: al menos 2 mm.

- Productos no rectificados: al menos 2 mm.

- Productos rásticos: 3 – 5 mm.
